

## **Man Yue Technology Receives Productivity and Quality Grand Award in the Hong Kong Awards for Industries**

(27 October 2013 – Hong Kong) – **Man Yue Technology Holdings Limited** (“Man Yue Technology” or the “Group”) (stock code: 00894), one of the largest Aluminum Electrolytic Capacitor (“E-Caps”) and Conductive Polymer Aluminum Solid Capacitor (“Polymer Caps”) manufacturers in the world, has been awarded the Productivity and Quality Grand Award in the Hong Kong Awards for Industries.

The Hong Kong Awards for Industries is organised by the Hong Kong Productivity Council. It aims to recognise the outstanding achievements, successful experience and strategies of manufacturers and enterprises in Hong Kong’s commercial and industrial sector as they advance towards high technology and high value-added operations. Man Yue’s award entries thus honoured were its “Screw Rotary Riveting Laser Welding Technology” and “Integration of Snap-in Sorting and Packing Workflow”.

The “Screw Rotary Riveting Laser Welding Technology” made the Group the first screw terminal type manufacturer in the world to combine laser welding technology with mechanical rotating riveting technology, which lowers welding resistance after riveting, and boosts ripple current endurance. This technology thus enhances quality, reliability and consistency of the products as well as shortens the production cycle. The “Integration of Snap-in Sorting and Packing Workflow” technology uses automation to reduce manual operation, together with the application of instant computer storage technology, defective products and unstable performance can be quickly and more accurately identified and removed. The two new technologies effectively bolster production efficiency and improve product quality and output. The Group’s technology has again been honoured further to being awarded the “Hong Kong Awards for Environmental Excellence ‘Class of Excellence’ Productwise Label (RH Series)” by Environmental Campaign Committee in 2011.

The key focus on R&D in innovative technologies and enhancing production capacity has enabled the Group to maintain its leading position as a major global manufacturer in the international capacitor industry.

**Ms Kee Chor Lin, Chairman of Man Yue Technology**, said, “We are very honoured to receive this prestigious industry award. This accolade is purposefully important as it represents recognition for our efforts in enhancing production capacity and the quality of our products and services, critical for boosting our overall profitability and continuously expanding our business. Looking ahead, we will continue to broaden our product range and enhance production and technologies in a bid to diversify our products and enable us to maintain as a major supplier of the electronic components in the world.”

**About Man Yue Technology Holdings Limited**

Man Yue Technology was founded in 1979 and listed on the Hong Kong Stock Exchange in 1997. The Group's core business is the manufacture and sales of high technology electronic components, including Aluminum Electrolytic Capacitors (“E-Caps”), Conductive Polymer Aluminum Solid Capacitors (“Polymer Caps”), Electric Double Layer Capacitors (“Super Caps”), Power Film Capacitors (“Power Film Caps”), EDLC Modules (“EDLC Modules”) and other innovative electronic components. As a key global manufacturer of E-Caps and Polymer Caps, the Group's renowned SAMXON® and X-CON® brands are respected for their advanced technology and superior quality. The Group operates state-of-the-art E-Caps manufacturing facilities at Dongguan, Wuxi and Jiangxi, in Mainland China, with a total production capacity exceeding 1 billion pieces per month. It also owns aluminum foil factories located in Qingyuan and Ya'an, in Mainland China producing foil for its own consumption, and also operates a chemicals production plant in Wuhan, Hubei Province in Mainland China. The Group has distribution offices located in Hong Kong, Mainland China, Taiwan, Malaysia, Japan and the United States. In 2011, Man Yue Technology was ranked second among the “Best Small-caps” in Hong Kong as selected in FinanceAsia's Best Managed Companies Poll 2011.
